- When the biker comes in, the runner removes the chip, puts it on their ankle and then runs through the transition. This takes place near the BIKE IN
- The runner then runs through the transition area towards the run out.
- The swimmer and biker need to be body marked including numbers (for officials) and an “R” on their calf.
- Only the runner will need to wear the race number bib (on the front). Runner needs to get body marked with an R on their calf

## THE TRANSITION ZONE

- Your bike needs to be placed in a designated spot on your bike rack (by bib #), as we have to vacate part of the transition area before the long course is complete to prepare for the kids race. See the images on the next page.
- When setting up your bike, your transition equipment has to go on the side of the rack with the tire touching the ground. If you hang your bike by the handlebars you put your stuff near your back tire, or if you hang your bike by your seat you need to place your transition area near your front tire.
- After the swim you will get your bike and walk or jog your bike to County Road 4/Rice Lake Road, mount bike, cross over to the opposite shoulder and go to the left.
- When you come in from the bike, you will dismount bike on the road and walk your bike over the foot bridge to the transition area.
- NO BIKE RIDING ON THE FOOT BRIDGE OR IN THE TRANSITION AREA.
- Once you have your running shoes on you will run out of the transition area and go right on County Road 4/Rice Lake Road. Follow the arrows.
- Relay bikers will transfer the chip to the runner after crossing the small bridge

Rear wheel touching ground.

Hung by seat, front wheel down

- Rack your bike anywhere on the rack with your number. All 20 spots on the rack is assigned, so all spaces will be used.
- You will rack your bike by the handlebars, or hang it by the seat. You need to place your equipment on the side of the rack that has your wheel on the ground, taking up no more than one additional space next to your bike.
- Rack your bikes **between** the red tape.
- Make sure to re-rack your bike in the same place and same side when you come back to the transition area.
- Sample layout: Arrows show appropriate “side” for equipment (green shows either side). Note that 5 bikes will need to fit on every rack. Transition volunteers may ask people, to minimize their areas if they take up too much room. Lead volunteers may have to move improperly racked bikes to make room for others

  - Let timing team know if you drop out of the race for any reason and return your chip.

  - The bike course has some rough sections with cracks in the road, but is mostly smooth
  - The corners have been swept and there will be volunteers on every corner. If there isn't a volunteer at an uncontrolled intersection, please do not blindly go through that intersection without looking (side roads meeting the course have stop signs)
  - Be cautious of homeowners backing out of their driveways. Be very cautious when biking through the start/finish area. There are 100's of spectators and sometimes they cross the road without looking for on-coming bikers.
  - Each competitor is responsible that his/her bicycle meets the minimum safety standards required. We will have Ski Hut at the race to help with any bike issues you may have. Please come prepared since the bike mechanics will be very busy.
